

Solutions for Patient Chart Research

Patient chart research is challenging. Healthcare professionals can be reluctant to participate. Reminders are needed (repeatedly). Physicians forget where they left off.

With 25+ years' experience, we know how to deliver seamless patient chart research.

Our veteran team of recruiters and project managers see your project through from first recruit to final data.

- Recruit the most engaged respondents
- Establish correct commitment expectations upfront
- Ensure timely, respectful reminders

Qualitative and Quantitative research recruiting

Specialized recruiting to find the most dedicated respondents

Most therapeutic areas: oncology, rheumatology, gastroenterology, infectious disease & more

Automatic completion reminders & customizable individual respondent progress reminders

Flexible programming solutions, including patient chart simulation

Appropriate honoraria, reflective of both the time & effort commitment

Experience Reckner

We deliver the best respondents for your research, every time
